LASER VEIN TREATMENT

Face Veins

- > Rosacea, cherry spots, red birthmarks
- > Spider veins, blue & green reticular veins

Leg Veins

- > Spider veins
- > Medium reticular veins
- > Deeper blue/green veins
- > Treats multiple depths in one treatment
- > Veins slowly reabsorbed into the body over 2-4 months
- > Low incidence of new vessels forming
- > 4 months to final result

DEPTHS OF VARICOSE VEINS

	<div>Spider Vein</div> <div>Facial Telangiectasia</div> <div>TREATED WITH: Laser</div>
	<div>Spider & Reticular</div> <div>Fine Leg Telangiectasia < 0.5 mm diameter</div> <div>TREATED WITH: Injection & Laser</div>
	<div>Deep Reticular</div> <div>Spider Leg Veins 0.5 - 1.5 mm</div> <div>TREATED WITH: Injection & Laser</div>
	<div>Deep Reticular & Varicose</div> <div>Reticular Leg Veins 1 - 3.5 mm</div> <div>TREATED WITH: Injection</div>

SCLEROTHERAPY TREATMENT

- > Injectable Chemical Ablation
- > Foamed Medicine (Asclera®) is injected
- > Using Cutting Edge Vein Light
- > Vein Light increases accuracy
- > For Spiders & Medium Reticular Veins
- > For Deepest blue/green & Varicose Veins
- > Veins begin closing in approx. 1 week
- > 2-12 months to final result – depending on complexity
- > 1-3 treatments depending on complexity

ASCLERA®
(polidocanol) Injection
